

Wiper Motor Switch & Cable Assembly

Follow the installation procedure described in the Shop Manual. Pay particular attention to the information below:

Both the switch and motor must be in the **ON** position before tightening the screw on the outside of the cable.

OR

Both the switch and motor must be in the **OFF** position before tightening the screw on the outside of the cable.

You **cannot** tighten the screw which secures the outside of the cable with switch **ON** and the wiper motor **OFF**. You might force the cable wire out of the internal drum assembly.

AND

You **cannot** tighten the screw which secures the outside of the cable with switch **OFF** and the wiper motor **ON**. You might force the cable wire out of the internal drum assembly.
